MPA
Mobile Public Address

The revolution in warning
and information via loudspeakers!

**The app "MPA" innovatively provides audio
content to ensure crowd control in operations,
disasters and events.**

For this purpose, already in „times of piece", topicspecific
announcements, also noises, are created and managed
using the CMS (Content Management System) of MPA
web app, which can be operated from any device with
internet browser. In the operation, the app takes over on
the mobile phone. Shortcuts enable quick access to specific
content. The content, in synch with the CMS, is then trans-
mitted **via Bluetooth® to** emergency vehicle siren-, por-
table and stationary **speakers**. In the event of a Blackout
(or other reasons for a failure of the mobile Internet),
the audio library at the mobile phone will still be fully
available.

Anywhere
and at any time.

For needs on spontaneaus announcements, the **mobile
phone turns into a wireless microphone**. The functions
live-speech, record and play help to achieve optimum
acoustic performance even in rapidly changing operational
situations.

Administration in the webbrowser:
Upload contents, record or use text-to-speech-module,
share contents with other system participants, ingrated
translation module

Distribution via mobile phones:
Mobile internet keeps audio content
from authorized app-users synchron

Public address via loudspeakers:
Clear understandable, also multilungual,
audio content to the public

* direct via EUROSIGNAL-Bluetooth®-receiver or indirect via
   Bluetooth® of the vehicle´s audio system. For older
   vehicle models, cable connectors may also offer an alter-
   native

Quickstart MPA-CMS:

www.eutooth.com

1 Register at www.eutooth.com and become master-administrator

2 Add more admins and authorized MPA-App users

3 Create announcements with AI in 40 languages and with more than 100 natural acents

4 - Browse sample folders by name, some filled with templates
- Create and populate your own directories with...

5 ...
- subdirectories
- announcements
- sounds

+ Add
- Directory
- Announcement
- Noise

Announcements can be created by
- upload
- record
- „text-to-speech"

6 Create content

Upload file | Record | Text to speech

Drag file here or Browse...

Overwrite filename

Create content

7 „Text-to-speech"-module, using example Blackout-announcement: type text, then tune for best result

Language: Englisch (GB)
Accent: James

Insert pause | Adjust emphasis | Insert sound | 1.00 | 0.00

Wail | 1200ms | Attention! | 500ms | Attention! | 500ms | This is the fire department. | 1500ms | Due to an incident, the power supply is temporarily, but of longer duration, failing. All responsible forces are making every effort to restore it as soon as possible. For local emergency information, please refer to the information poster stands as they are being set up at central street locations. Certain radio stations broadcast up-to-date information every hour on the hour. We thank you for your understanding.
